Coordinates: 41°8'3.5"N 7°6'50.8"W

Construction of the dam began in 1974. The dam was completed in 1982. It is owned by *Companhia Portuguesa de Produção de Electricidade* (CPPE).^[1]

Dam [\[edit \]](#)

Pocinho Dam is a 49 m tall (height above foundation) and 430 m long gravity dam with a crest altitude of 139 m. The volume of the dam is 120,000 m³. The spillway with 4 radial gates is part of the dam body (maximum discharge 15,000 m³/s).^[1]

Reservoir [\[edit \]](#)

At full reservoir level of 125.5 m (maximum flood level of 134.5 m) the reservoir of the dam has a surface area of 8.29 km² and a total capacity of 83.07 mio. m³. The active capacity is 12.24 (12)^{[2][3]} mio. m³.^[1]

Power plant [edit]

The [run-of-the-river hydroelectric](#) power plant was commissioned in 1983^{[2][3]} (1982).^[4] It is operated by [EDP](#). The plant has a [nameplate capacity](#) of 186^{[1][2][3][4][5]} MW. Its average annual generation is 408.4^[2] (406.2,^[5] 530^[3] or 534^{[1][4]}) GWh.

The power station contains 3 **Kaplan turbine**-generators with 57.6 MW (62 **MVA**) each in a dam powerhouse located on the left side of the dam. The turbine rotation is 88.2 rpm. The minimum **hydraulic head** is 15.5 m, the maximum 21.6 m. Maximum flow per turbine is 390 m³/s.^[2]

The turbines were provided by Kvaerner, the generators by ABB Group.^[4]

Lock [[edit](#)]

On the right side of the dam is a [lock](#), which can handle ships with the following maximum properties: 83 m in length, 11.40 m on the beam, 3.8 m load-draught and a cargo capacity of 2500 tons.^[6]

Location within Portugal

Official name	Barragem do Pocinho
Country	 Portugal
Location	municipality Vila Nova de Foz Côa, Guarda District
Coordinates	 41°8′3.5″N 7°6′50.8″W
Purpose	Power
Status	Operational
Construction began	1974
Opening date	1982
Owner	Companhia Portuguesa de Produção de Electricidade
Operator	Energias de Portugal
Dam and spillways	
Type of dam	Concrete gravity dam
Impounds	Douro
Height (foundation)	49 m (161 ft)
Length	430 m (1,410 ft)
Elevation at crest	139 m (456 ft)
Width (crest)	6.4 m (21 ft)
Dam volume	120,000 m ³ (4,200,000 cu ft)
Spillway type	Dam body
Spillway capacity	15,000 m ³ /s (530,000 cu ft/s)
Reservoir	
Total capacity	83,070,000 m ³ (67,350 acre-ft)
Active capacity	12,240,000 m ³ (9,920 acre-ft)
Surface area	8.29 km ² (3.20 mi ²)
Normal elevation	125.5 m (412 ft)
Power Station	
Operator	Energias de Portugal
Commission date	1983
Hydraulic head	21.6 m (71 ft) (max)
Turbines	3 × 57.6 MW Kaplan-type
Installed capacity	186 MW
Annual generation	408.4 GWh
